Professional Summary

Disciplined, quick learner with excellent interpersonal and relationship building skills. Able to work independently and as part of a team. Seeking a software development role with a company committed to developer growth.

Technical Skills

Spring Boot, Java, PostgreSQL, HTML, CSS, JavaScript, Vue.js, Responsive Design, IntelliJ, Git, Unit Testing (JUnit), E/R diagrams, Integration Testing, Unix

Technical Experience

Vending Machine Application - Worked with one other software developer to design an object oriented virtual vending machine program using Java (IntelliJ) that displays inventory/stock from a file and accepts user input for depositing money and making a purchase.

"Tenmo" Application- Designed and built a secure money transfer API similar to venmo, using MVC pattern and REST. The server-side is powered by the spring framework and incorporates postgresSQL. Security uses JSON web tokens (JWT's) for authentication and authorization.

Shared Shopping List Application- Designed and built a full-stack application that gives users the ability to create groups that have shopping lists that users can add/remove items from. A random invite code is generated for each group that users can use to join a group and have access to that groups shared lists. For this application I used CSS, HTML, Java Spring Boot, PostgreSQL, Vue.js.

Education
